

TAMER BASAR

19 January 2006 is the 60th birthday of Honorary Editor of our Journal, Dr., Professor, member of the National Academy of Engineering (of the USA) the Fredric G. and Elizabeth H. Nearing Professor of Electrical and Computer Engineering, Professor in the Center for Advanced Study and Research Professor at the Coordinated Science Laboratory, Tamer Basar.

Tamer Basar is a well-known specialist in the fields of dynamic games and stochastic teams, decentralized detection and estimation, nonlinear and adaptive robust control, applications of control and game theory in economics, information technology research and others. He is a Fellow of IEEE, a Fellow of IFAC, a member of European Academy of Sciences, member of SIAM, charter member of Game Theory Society, member of American Mathematical Society, and founding past-president of International Society of Dynamic Games.

The Editorial Board of our Journal congratulates Tamer Basar on the occasion of his 60th anniversary, and wishes him success in his multi-faceted activities.
